INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

International Application No. PCT/AU2003/001099 26 August 2003 International Patent Classification (IPC) or national classification and IPC Int. Cl. 7 C10B 53/00, C02F 11/10 Applicant ENVIRONMENTAL SOLUTIONS INTERNATIONAL LTD et al 1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 3 sheets, including this cover sheet. This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of 5 sheet(s). 3. This report contains indications relating to the following items: I X Basis of the report II Priority III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability IV Lack of unity of invention V X Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement VII Certain documents cited VIII Certain defects in the international application Date of submission of the demand 11 February 2004 Authorized Officer Authorized Officer	Applicant's or agent's file reference 109087	FOR FURTHER See ACTION Exam	ER See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416).

NOVELTY(N)

Claims 1-27

WO 2000/56671

US 5865956

US 4781796

None of the above citations disclose a process/apparatus for the conversion of sludges and carbonaceous materials, characterised in that the process comprises the steps of: (a) heating the material to be converted whilst being conveyed through a heating zone of a reactor in the absence of oxygen for the volatilisation of oil producing vapour product and a solid residue or char; (b) contacting the vapour product and char whilst conveying that char through a reaction zone of the reactor at a determined "weight hour space velocity" so as to promote vapour-phase catalytic reactions; and (c) removing and separating the gaseous products and char from the reactor, wherein the material and the resulting char are conveyed by way of a non-positive conveyor, and less than 5% of the material to be converted is passed from the reactor in a time less than that required to heat it to a temperature of more than about 400 C.

INVENTIVE STEP(IS)

Claims 1-27: As above:
